

## INTERFACE CABLE BETWEEN THE TKR-751 AND LT4200

The Kenwood TKR-751 requires a male DB-25 Connector for the CONTROL I/O Jack and a special connector for the TEST/SPKR Jack. The LT4200 uses a removable screw type of terminal block and requires the bare wire from the DB-25 cable and the TEST SPKR Cable.

Normally Pin 9 and 12 of the TEST/SPKR cable is connected together. This allows the use of the internal speaker.
