Updating the Speech Files

Find your ICON for the CS800D or the CS800, CS801 and CS750 and start the program.

The voice file that you should already downloaded from the website is a ZIP file. Don't forget to unzip it.

Click on the Load Fixed Voice Data in the Tools pulldown menu and you should see the following:

Load Fixed Voice Data			x
Write Fixed Voice Data			
Click [OK] to write resource	OK	Cancel	

Click on the rectangle with the three dots and you should get the following:

C Open					×
Look in: 🔒 CS800D WEBSITE UPDATE PROCE 👻	G 🤌 📂 🛄 -

This is a standard windows screen and you might have to search for your voice packet file.

Double click on the voice packet file and you should get the following:

Load Fixed Voice Data
Write Fixed Voice Data
C:\Users\Dean\Desktop\CS800D WEBSITE UPDATE PROCEDURE\VoicePacket2015-03-23
OK
Click [OK] to write resource to radio.

Press the OK key and you should get the following:

Load Fixed	Voice Data
W	rite Fixed Voice Data
	C:\Users\Dean\Desktop\CS800D WEBSITE UPDATE PROCEDURE\VoicePacket2015-03-22
	OK Cancel
Trans	mitting data.Please wait
-	

While the data is being loaded into the radio, the radio should show the following:

After the speech file has been loaded into the radio, the screen should show the following:

Press the OK button and you will now get the following:

Write Fixed Voice Data
Isers\Dean\Desktop\CS800D WEBSITE UPDATE PROCEDURE\VoicePacket2015-03-23.fv
OK Cancel
Click [OK] to write resource to radio.

Press the red button with the "X" to exit from this program. If you press the "OK" button like you would expect, the program will load the speech file again. This is not a problem but is a nuisance.

The radio will reset itself and now you are ready to use the radio. If you keep the DB15 programming cable plugged in, the radio will not annunciate the channel number until you remove the cable.
